The fact about October

The meaning behind October's name is far from accurate these days. The ancient Roman calendar was based on the lunar cycles, as opposed to our current calendar which is based on the solar cycles. This meant that there were originally 10 months in their calendar, and October was the eighth month. Its name literally translated into "the eighth month" in Latin. In 451 BC the two months of Ianuarius and Februarius were added to the beginning of the calendar, making October the 10th month.

Fire Safety Tip
